

### Homework Menu – Summer 2

Choose at least 1 item from the homework menu to be completed before the end of our first term. You can bring the work into school or send in photos on class dojo. In the last week, photos will be collated and presented to show off your child's hard work. Dojos will also be awarded for efforts.

### Non-fiction writing

Create a non chronological report to explain what a biome is and the different biome there are on Earth. You could also link this to our Science topic and research carnivores, herbivores and omnivores of different biomes.

# Would you rather be a predator, producer or prey?

### Science debate!

Create a set of pros and cons to being a predator, producer or prey. Based on this, decide which member of the food chain you would like to be.

Using the app Paint.net create your own under water sea creature by editing two or more images together.

Create your own version of Goldilocks and the 3 bears as a story board. Choose 3 items for Goldilocks to test in the house instead of porridge, chairs and bed. Use the French words for the main characters.

Create your own underwater landscape in the style of David Miller. You could use paints, collage or practise your shading skills with pencil crayons.
